Instalacja serwera windows

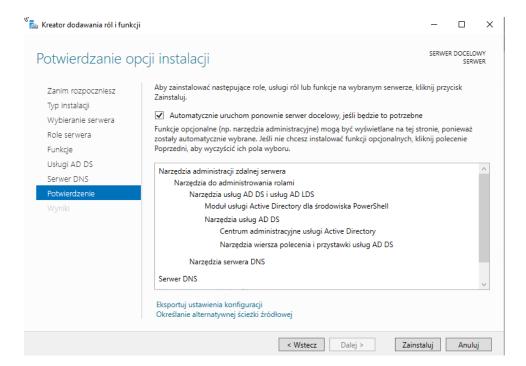

Instalacja kontrolera domeny

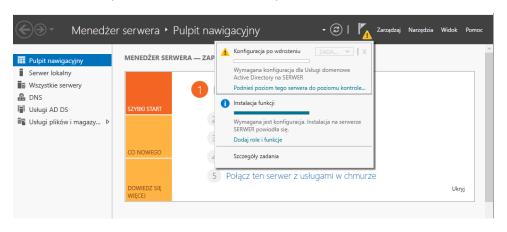

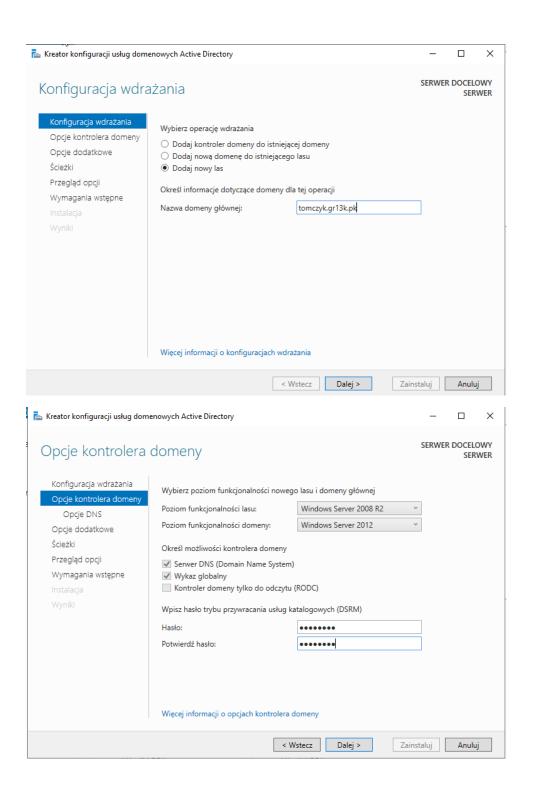

< Wstecz Dalej >

Zainstaluj Anuluj

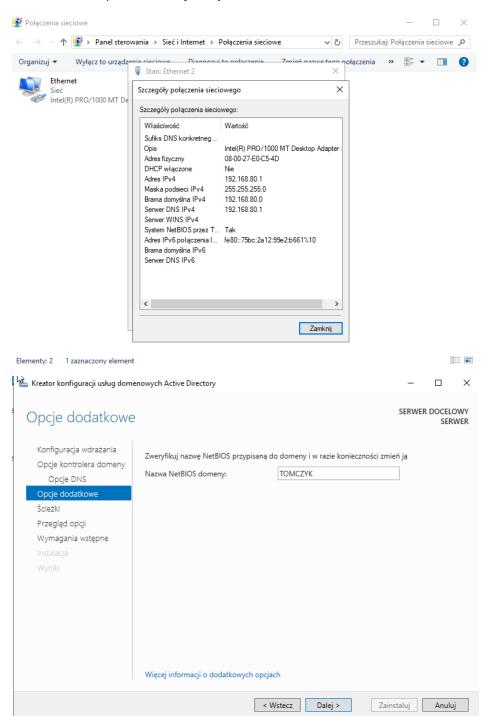

Podniesienie do poziomu kontrolera domeny

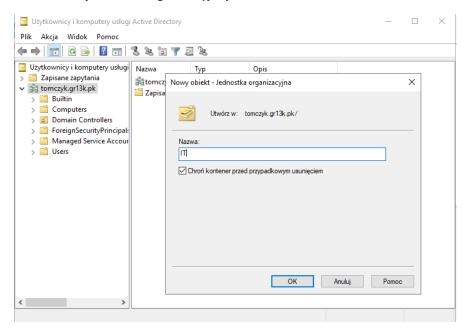

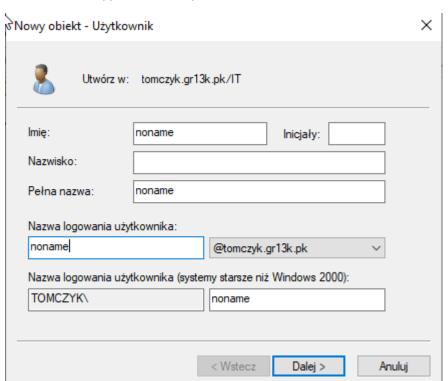

Ustawienia karty sieci wewnętrznej

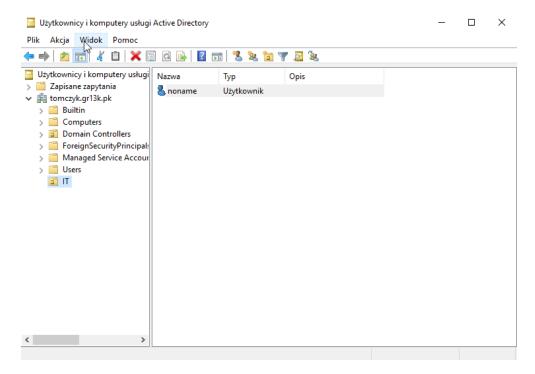

Utworzenie jednostki organizacyjnej IT

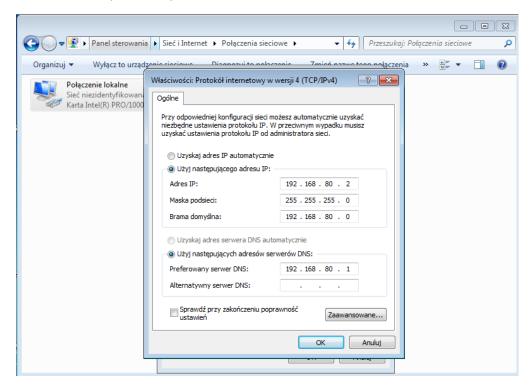

Utworzenie w tej jednostce urzytkownika noname

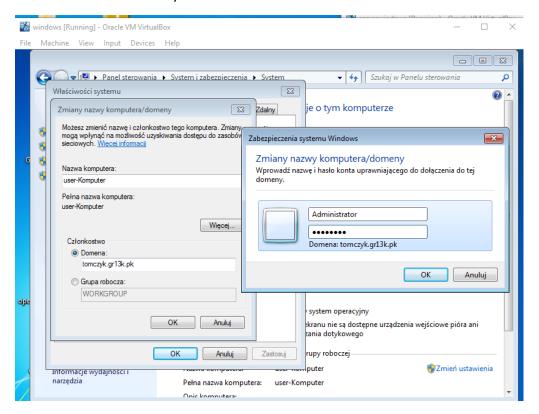

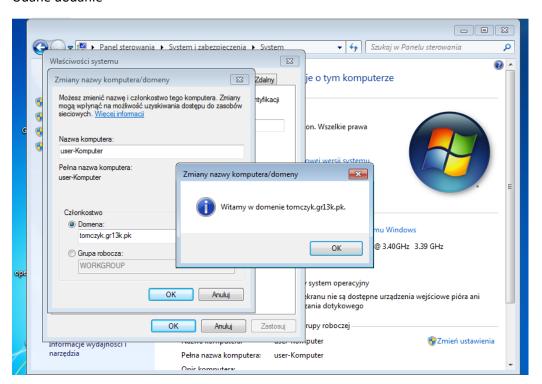

Ustawienia karty sieciowej klienta windows

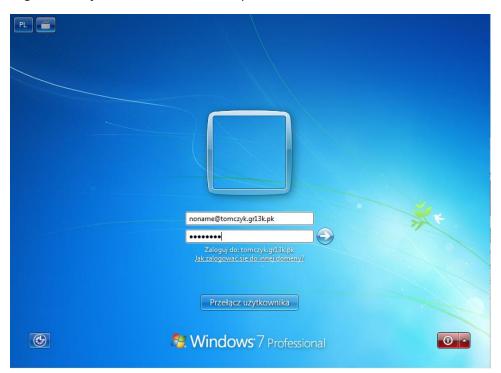

Dodanie klienta do domeny

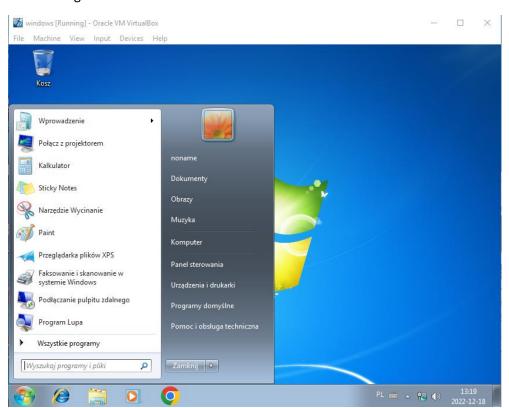

Udane dodanie

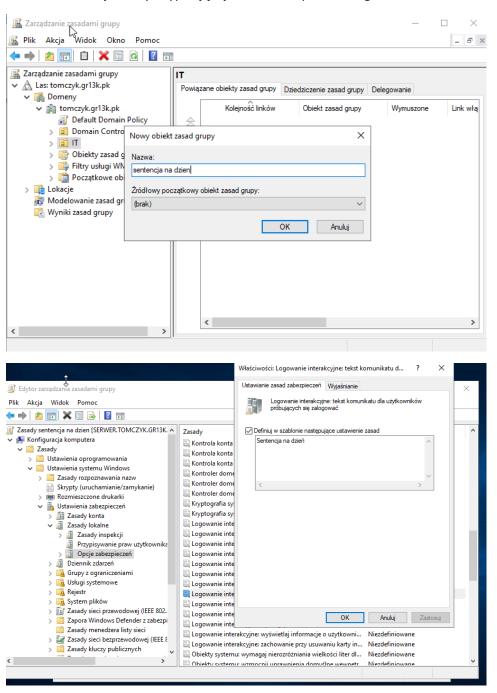

Logowanie się na konto noname z komputera klienta

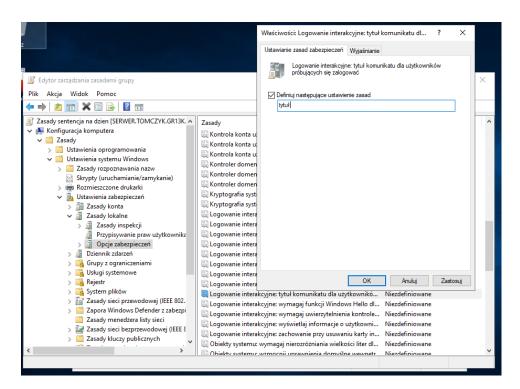

Udane zalogowanie

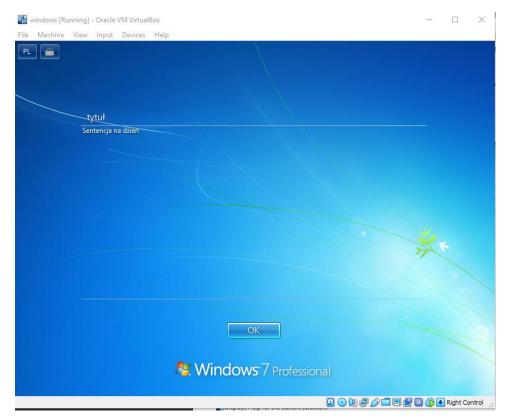

Tworzenie nowej zasady, wypisującej wiadomość podczas logowania

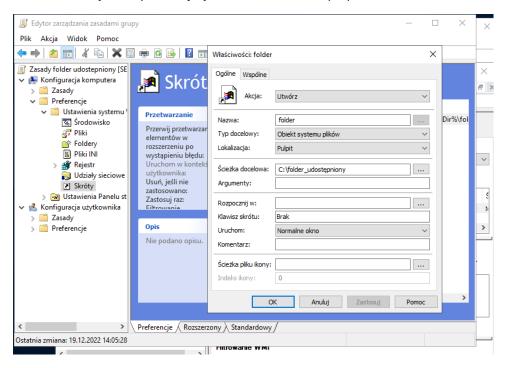

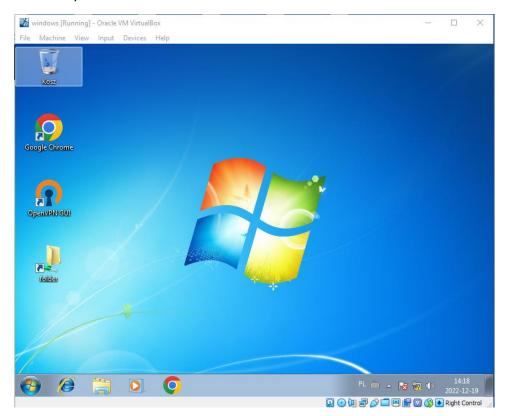

Utworzona i działająca zasada

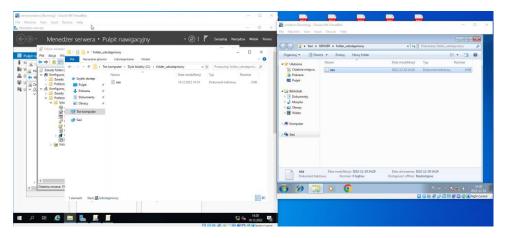

Dodanie nowej zasady tworzącej skrót do folderu na pulpitach klientów

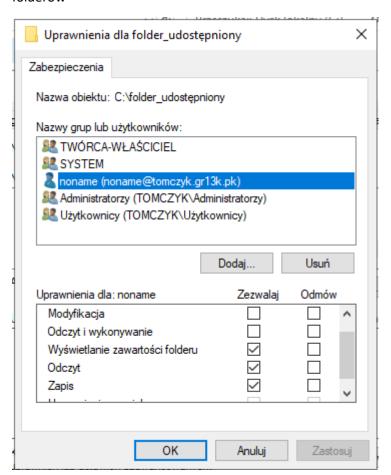

Utworzony folder

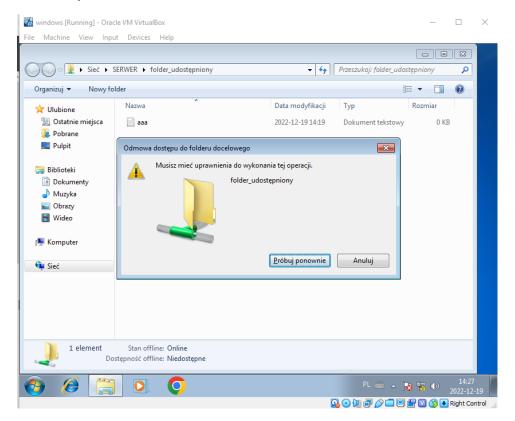

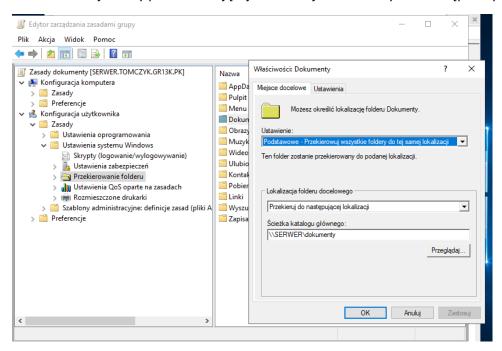

Zmiana uprawnień folderu na odczyt i zapis, brak prawa na wykonywanie zabrania tworzeniu folderów

Nieudana próba utworzenia folderu

Dodanie nowej zasady przekierowującej folder Moje dokumenty na udostępniony folder na serwerze

Udane przekierowanie, folder na serwerze jest widoczny po adresie \\SERWER\dokumenty\noname, jak i po C:\dokumenty\noname
